CORPORATE

Yektamak Engineering and Machinery is an innovative and global company designing and manufacturing fixtures, conveyors, under-hook rotators, handling and lifting equipment, transfer carts, positioners, fixtures, automated welding systems and custom engineering solutions.

All project phases from design and computer-aided simulations to manufacturing are implemented in YEKTAMAK's facility in Turkey. YEKTAMAK is able to provide after sale services all around the world through service partnerships.

Yektamak aims to provide solutions to make companies gain more production efficiency and sustain competitiveness.

QUALITY POLICY

In our engineering studies and production, we aim to keep the customer complacency and trust at the highest level by providing high quality products to our customers with "zero error" with continuously developed management systems and fulfilling our delivery commitments in the time.

OUR MISSION

Our mission is to ensure absolute customer satisfaction and to help our customers improve their business providing cost effective and high quality engineering solutions developed by research, science and experience.

OUR VISION

Our vision is to become a worldwide known and always preferred company creating value to its customers.
